

PROMOTING ENVIRONMENTALLY FRIENDLY BUSINESS ACTIVITIES

TERUMO'S ENVIRONMENTAL POLICY

The Terumo Group has formulated the following Basic Policy on the Environment and actively pursues activities to preserve the environment.

Terumo's Environmental Policy

Terumo sets voluntary targets and works to conserve the environment by:

- Ascertaining the environmental impact of our activities
- Developing environmentally friendly products
- Preventing pollution
- Making effective use of energy and resources
- Reducing waste

Terumo abides by the environmental laws, ordinances, agreements and other legal provisions of all countries.

Terumo has established a system to facilitate environmental efforts and it promotes and audits those efforts.

As a member of society and the community, Terumo supports and cooperates with environmental conservation activities.

Terumo conducts in-house informational and educational activities in an effort to increase its employees' environmental awareness.

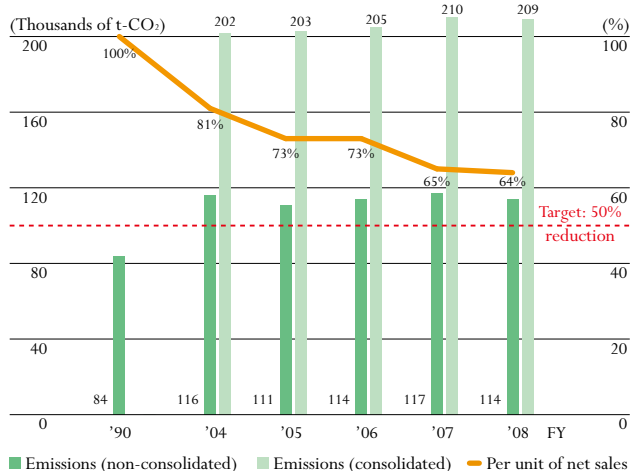

Adopted in December 1999

PREVENTING GLOBAL WARMING

Adoption of a stricter reduction target

Following our review of our CO₂ emission reduction target, in fiscal 2008 we enhanced our target reduction rate for fiscal 2012—expressed by the rate of reduction of CO₂ emissions per unit of net sales relative to the fiscal 1990 level—from 25% to 50%. Business activities began since then have been based on the revised level.

Trends in CO₂ emissions per unit of net sales (non-consolidated)

Terumo Mt. Fuji Reforestation Project

Terumo's two factories in Fujinomiya, Shizuoka Prefecture produce medical devices, and other products using groundwater that springs from the foot of Mt. Fuji. To protect the natural areas of Fuji that generate the good quality water, since 2003 Terumo has supported the Terumo Mt. Fuji Reforestation Project, cosponsored by the NPO organization Mt. Fuji Natural Reforestation Group.
